# SANCAN EXPORTS LANKA (PVT) LTD

COIR PITH PRODUCTS | SPICES | ESSENTIAL OIL | DEHYDRATED FRUITS | COCONUT PRODUCTS

# ABOUT US

**Sancan Exports Lanka (Pvt) Ltd was established in the year 2010. By today we are one of the best Coir Fiber Pith Producers in Sri Lanka. Core products are Coir Fiber Pitch Products with the certifications of GMP certificate, CDA, and EU Organic. Sancan Exports Lanka (Pvt) Ltd is also identified as one roof store with other identified Organic & Natural Products such as Coconut Products, Spices, Dehydrated fruits, and Essential Oils.**

**Our factory is based in Hambantota and Colombo District. Tangalle area we call the “Mini Coconut Triangle” of Sri Lanka gives us an advantage of getting high-quality raw materials in the country. The company has gained a good reputation and a fair position in the International Market since always been a part of eco-friendly product manufacturing and high-quality end products.**

# **PRODUCT PORTFOLIO**

## **COIR PITH PRODUCTS**

**COCO PEAT 650G BRIQUETTES, COCO PEAT 5KG BALES, COCO PEAT 25KG BALES, COCO PEAT 80 - 90G DISKS, GROW BAGS, COIR ROPES, DOORMAT, COIR GEOTEXTILE, COIR FIBER, COIR POT NEST, COIR CHIPS**

## **SPICE PRODUCTS**

**CEYLON CINNAMON, BLACK PEPPER, WHITE PEPPER, DEHYDRATED GREEN PEPPER, NUTMEGS, MACE, CLOVES, CARDAMOM, MORINGA, LEMONGRASS, DEHYDRATED CURRY LEAVES, GINGER, TURMERIC, VANILLA, GARCINIA**

## **COCONUT PRODUCTS**

**VIRGIN & EXTRA VIRGIN COCONUT OIL IN GLASS JARS, VIRGIN & EXTRA VIRGIN COCONUT OIL IN PAILS, VIRGIN & EXTRA VIRGIN COCONUT OIL IN IBC CONTAINERS AND DRUMS, COCONUT BUTTER, COCONUT FLOUR, COCONUT MILK, DESICCATED COCONUT, COCONUT WATER, KING COCONUT WATER, COCONUT MILK POWDER, COCONUT SUGAR, VIRGIN COCONUT OIL, RBD OIL**

## **FRUIT & FRUIT POWDERS**

**COIR FIBER PRODUCTS**

## **COCO PEAT 650 G BRIQUETTES**

**650 Briquettes are specially produced for retail markets for the users of coco peat in gardening, cropping, and all horticulture and hydroponic applications. Gives the maximum cost benefit to the retailer and the customer. Wrapped briquettes with customer-specified labels are available.**

## **COCO PEAT 5 KG BALES**

**5 kg bales are suitable for users who need coco peat in bulk quantities. A high compression ratio, as high as 4:1 makes the transport costs low and affordable. These can be used for any hydroponic or horticulture application after preparation for re-use. It is also suitable for applications in preparing the potting mix, animal farms (bedding), grass turfs, erosion control, and other industrial applications.**

## **COCO PEAT 25 KG BALES**

**25 kg bales for users who need cocopeat in bulk quantities. 2.5: 1 compression ratio gives a better economy for the users by reducing the transport and handling costs. These are ideal for any hydroponic and horticulture application in preparing the growing media.**

**For applications such as animal bedding (farms), preparing a potting mix for retailers, turfs, landscaping, or in erosion control applications with coir mats.**

## **COCO PEAT 80 - 90 G DISKS**

**Disks use in greenhouse and retail markets. Smaller sizes are used in seedling and seed raising. Larger sizes are used for strawberries, gerbera, and roses. Standard coco peat is used for typical coco discs and coco chips also can be mixed as per customer requirements. Can wrap for supermarkets and retail shops or unwrapped for industrial use.**

## **GROW BAGS**

**Grow bags are used in greenhouses for professional agriculture and horticulture for growing tomatoes, cucumber, strawberries, eggplant, melon, beans, capsicums, roses, lettuce, etc. in the grow bags the plant can be directly planted and grown. In the plant, holes can be made on the top surface of the bag. Available in different sizes as per customer requests.**

## **COIR ROPES**

**Coir ropes have many uses, including tying up animals, securing loads, and webbing for beds. Coir fiber is also used to make other things like brushes, doormats, mattress filling, padding inside furniture, sacking, garden twine, and matting for pot plants and gardens.**

# COIR GEOTEXTILE

**Coir geotextile is a 100% organic fiber, from a renewable source, the coconut husk.**

**Naturally resistant to rot, molds, and moisture, it needs no chemical treatment.**

**Hard strong, it can be spun and woven into matting. It also has the right strength and durability to protect the slopes from erosion, while allowing vegetation to flourish. It can dissipate the energy of flowing water and absorb the excess solar radiation.**

## COIR FIBER

**Coir fiber is produced through traditional milling by separating the long bristle fiber from the coconut husk after retting in husk pits. The shorter fibers are mattress fibers used for bedding, upholstery, filling material, erosion control, and drainage filtering.**

## **DOORMAT**

**Our COIR DOORMATS are eco-friendly as they are made out of coir fiber which is extracted from the outer husks of coconut. This thick and strong coir fiber gives the coir mats its most desirable features of durability, functionality, and longevity. These coir doormats are highly resistant to water and are very efficient in trapping dirt, soil, and mud right at the doorstep hence preventing the grime and moisture from tracking inside the home.**

## **COIR POT NEST**

**Coir pot nests are organic, and 100% biodegradable. It can be planted directly in the ground. Avoid root disruption and provide better root structure. This allows water into the root system and helps plants to utilize natural nutrients. Further, this can be used for home plantation and it gives such a benefit as a garden fence or balcony railings, space-saving, flower growing, and eye-catching, as well as cane, make hanging strings for your ease. These eco-friendly coir pots can omit plastic waste too.**

# SPICES

# **CEYLON CINNAMON**

**(TRUE CINNAMON, PURE CEYLON  
CINNAMON)**
